“Working with Families of Returning Veterans”

The readjustment phase that follows war-zone deployment can be challenging not only for veterans, but for their loved ones as well. Strategies will be discussed for assisting veteran families in adjusting to changes that inevitably occur in roles, relationship dynamics, and child development while service members are deployed. In addition, attendees will learn how the more common mental health issues seen in returning veterans affect family members, and ways in which families can provide support while also tending to their own emotional needs.

Suzanne Best, Ph.D., joined the PTSD Research Program at the San Francisco VA Medical Center in 1996, where she has directed studies of combat veterans and other trauma survivors. In 2005 she relocated to Portland, where she has continued her relationship with the SFVA by telecommuting to provide weekly clinical consultation to therapists treating recent veterans. In her private practice, Suzanne specializes in the treatment of veterans, emergency services personnel, and civilian victims of trauma and conducts privately retained forensic evaluations in civil litigation. In 2006, she co-authored the book, *Courage After Fire: Coping Strategies for Troops Returning from Iraq and Afghanistan and Their Families*.
